

2016-2017 MAJOR ACCOMPLISHMENTS

OUR MISSION:

The Clinical Compass (CCGPP) mission is to gather and evaluate existing evidence-based practice information; to facilitate the development of new information where existing evidence is lacking; and to distribute and assist in implementation of evidence-based practice information that is relevant to the chiropractic profession.

- ❖ Hawk et. al publication of the Non-drug, Non-operative Shoulder Systematic Review in JMPT. (<http://bit.ly/2z9NBmN>)
- ❖ Acquisition of funding and overseeing the completion of the first "Whedon Opioid Study" (n=13,384) which concluded that patients who received chiropractic care were 55% less likely to have an opioid prescription filled and these patients also had 78% total lower drug utilization costs.
- ❖ Acquisition of funds for the second "Whedon Opioid Study", which is expected to have over one million subjects. Project start date late 2017.
- ❖ Chiropractic Algorithms within Clinical Compass' LBP guideline (<http://bit.ly/2sGc2Fj>) used in Federal Court to win malpractice case filed against a Doctor of Chiropractic.
- ❖ Collaboration with the World Federation of Chiropractic, and the Canadian Guideline Initiative to reduce duplication of resources and coordinate efforts.
- ❖ Formal adoption of the Canadian Chiropractic Guideline Initiative's Cervical Spine Guideline
- ❖ Formal endorsement of the American Chiropractic Association's participation in the *Choosing Wisely* Campaign.
- ❖ Clinical Compass guidelines embedded into multiple Chiropractic EHRs to fight payer denials.

"Our incredibly dedicated volunteer Board and Research Commission delivers exceptional value to the chiropractic profession through Clinical Practice Guideline Publications, fundraising for mission-critical research on chiropractic's impact on the opioid crisis, and strategic partnerships and initiatives that ensure exponential impact."

- Dr. Jay S. Greenstein -> Chairman, Clinical Compass
